ABOUT ME

• Problem-Solving Enthusiast: I find joy in solving challenges, turning them into opportunities for personal and professional growth.

• Adaptable & Results-Driven IT Professional: Quick learner, adaptable to new technologies, and committed to delivering high-quality results.

EDUCATION

Bachelor of Engineering (B.E) in Information Technology – Lok Jagruti University

• Pursuing (Currently completed 5th semester)

• SPI: 8.17 (Sem-1) | 8.93 (Sem-2) | 9.38 (Sem-3) | 9.6 (Sem-4) | Average – 9.02

SKILLS

• **Languages** : JavaScript | Python | PHP | Java | C#

• **Frameworks & Libraries** : React | Node | Express | .NET | ASP.NET Core MVC | NumPy | Pandas | Seaborn | Matplotlib | Scikit-learn | Django | Bootstrap | Tailwind CSS

• **Databases** : MongoDB | MySQL | PostgreSQL

PROJECTS

1. Digital Mall System (July – 2024)

Java | JDBC | MySQL | Data Structures (Linked List, Stack)

Built a console-based shopping system where users can add/remove products to cart using Linked List, and search history is managed using Stack. Integrated MySQL database with JDBC to handle product operations using stored procedures. Added billing with file handling and real-time updates with threads and date functions.

2. Nexus Study: A Virtual Study Group Platform (July – 2025)

Python | Django | Django Channels | WebRTC | JavaScript | SQLite

Developed a full-stack, real-time web application for online study groups, featuring secure user authentication and password-protected rooms. Engineered a multi-peer video call system using WebRTC for direct P2P connections and Django Channels for real-time signaling, chat, and in-call status indicators.

3. Rentopedia – Online Rental Property Platform (July – 2025)

MERN Stack | Cloudinary | Socket.IO | JWT | Tailwind CSS

Built a full-stack rental system where users can list, browse, and rent properties with secure JWT auth. Integrated Cloudinary for image uploads, real-time rent requests & notifications via Socket.IO, and owner controls to accept/reject requests with auto status updates.

4. CareConnect – Hospital Appointment & Medical Record Management System (March – 2026)

ASP.NET Core MVC | Entity Framework Core | SQL Server | Bootstrap | Cookie Authentication | SMTP

Developed a role-based hospital management system with Admin, Doctor, and Patient panels, enabling doctor management, appointment booking, appointment tracking, SMTP email verification, controlled medical report access, and prescription management.

EXTRA-CURRICULARS & CERTIFICATIONS

- **Coursera** : Inheritance and Data Structures in Java (May – 2024)
- **Coursera** : Introduction to HTML, CSS & JavaScript (December – 2024)
- **Coursera** : Exploratory Data Analysis for Machine Learning (June – 2025)

LANGUAGES KNOWN

- **Gujarati** : Native / Fluent
- **Hindi** : Fluent
- **English** : Intermediate
